

Agriculture, Modern Food Production and the Environment: Diploma

SCC's Agriculture, Modern Food Production, and the Environment program provides students with the opportunity to prepare for a lifetime of learning through classroom and internship positions limited only by students' initiative and imagination. This program prepares students to serve the food production and processing industries through operation of feed mills, fertilizer plants, elevators, retail farm supply stores, and farm equipment dealers. The program is also designed to provide improved skills in the areas of crop and livestock production, agriculture equipment, and farm business management.

Students may choose to pursue the Pathway most relevant to their desired career. Pathways include Agriculture Business, Agronomy, Animal Science, Online, or Specialty Crop.

In Spring semester students must take at least 9 credit hours from the elective grouping AGA-376, AGB-331, AGC-420, AGS-225, and AGS-226.

The Modern Food Production certificate is awarded after successful completion of first semester courses.

Where will this take me?

Animal Handler
Agricultural Crop Worker
Farm Business Management
Horticultural Worker
Soil and Water Conservationist
Nursery or Greenhouse Manager
Farm Product Buyer or Purchasing Agent
