

Biomedical Electronics Technology Online Program - AAS

The Biomedical Electronics Technology program is an interactive, online program designed to prepare the student to seek a variety of entry-level positions in the biomedical industry. Students encounter courses related to electronics, networking administration, and cybersecurity, along with courses specific to biomedical equipment technology. An emphasis on medical applications, operations, and procedures is embedded within the various program courses. The program includes instruction in instrument calibration, design, installation, and testing, as well as safety, maintenance, and equipment repair procedures. Students will be placed in an internship where they will be able to apply all of the skills learned throughout the duration of the program.

Students who complete the two-year program will be prepared for the Biomedical Equipment Technician (BMET) certification.
