

## Chemistry Transfer Major - AS

---

The Chemistry Transfer Major at SCC provides a well-rounded two year program for students who plan to continue their education as a chemistry major at a four year college or university. This 61 semester-hour program includes those chemistry courses typically taken during the first two years of college (General Chemistry I & II and Organic Chemistry I & II) along with the necessary math courses (Calculus I & II) and physics courses (Classical Physics I & 11). All of the science courses have a lab component. Other courses for the Chemistry Transfer Program have been selected to both satisfy the requirements for the Associate of Science Degree and to provide the student with educational experiences that meet all of the SCC core competencies in 1) communication, 2) critical thinking, 3) cultural awareness, 4) civic awareness, and 5) quantitative and scientific reasoning.
