

Occupational Therapy Assistant - AAS

If you are searching for a career that is meaningful, health related, and provides a range of study opportunities with diverse work settings to choose from, occupational therapy might be a perfect fit for you.

The Occupational Therapy Assistant Program is a 21-month (seven-term) program that prepares the student to become an Occupational Therapy Assistant (OTA). The occupational therapy assistant works with, and under the supervision of an occupational therapist, to improve and support functional performance in daily activities. OTAs, within their scope of practice, assist with the process of client evaluation, goal setting, implementation of care and documentation of occupational therapy services. Upon completion of the program, the associate degree graduate will be educationally prepared to provide service throughout the lifespan to individuals who have difficulties due to developmental, physical, cognitive and emotional impairments. After program completion, you will be eligible to take the national certification examination for occupational therapy assistants administered by the National Board for Certification in Occupational Therapy (NBCOT).

Indian Hills Community College will offer the award. This is a shared program between SCC and IHCC.

Where will this take me?

Occupational Therapy Aide
Occupational Therapy Assistant
