Program Information

The Agriculture program provides students an opportunity to experience the various aspects of the agricultural industry as they learn about agronomy/crop production, animal production, new technologies, and agriculture business. Through the use of hands-on experience, guest speakers, conferences, and field trips in addition to classroom lectures, students experience the impact of agriculture in the region and are prepared for entrance into a number of different career opportunities.

The Agriculture Certificate is awarded after successful completion of first semester courses.
