Construction Technology: Carpentry Emphasis - Building Construction Certificate

West Burlington Campus

The Construction Technology – Carpentry program combines the National Center for Construction Education and Research (NCCER) curricula with the Associate of Applied Science degree requirements, meshing illustrated instructional material with structured classroom activities.

This program emphasizes four levels of carpentry, with each building on the previous level. During the summer term between the students' first and second year, a paid internship is required, giving students real-world experience with a local construction company.

*Certificate can be earned one time.

Please view the technical standards for this course.
